Program 10:

Develop programs for creating classes in a package, accessing a package, importing a class from other package

CODE:

PACKAGE ONE.SUBONE

```
package one.subone;

class subpack{
   void meth1(){
   System.out.println("i am subpackage of one package");
}

public class Test{
   public static void main(String[] args){
      System.out.println("My name is sub package (one)");
      subpack s1 = new subpack();
      s1.meth1();
}
```

OUTPUT:

D:\java>javac -d . Test.java

D:\java>java one.subone.Test My name is sub package (one) i am subpackage of one package

D:\java>

G3 A

PACKAGE TWO

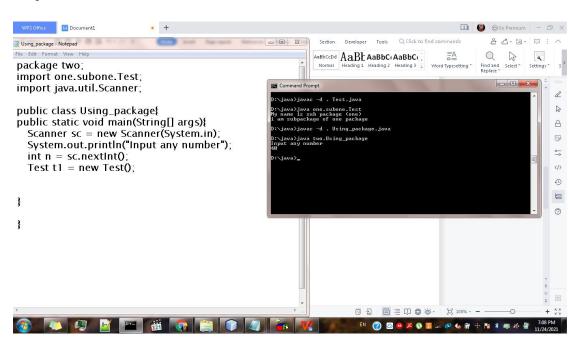

```
package two;
import one.subone.Test;
import java.util.Scanner;
public class Using_package{
  public static void main(String[] args){
    Scanner sc = new Scanner(System.in);
    System.out.println("Input any number");
    int n = sc.nextInt();
    Test t1 = new Test();
}
```

OUTPUT:

D:\java>javac -d . Using_package.java

D:\java>java two.Using_package Input any number 40

D:\java>
